Brighton Technologies Group Improves Guest Experience with Real Time Location and Wireless Communication Systems.

In today's fast moving world, reliable and user friendly "staff to staff" and "staff to customer" communication paths are key. Australia's Brighton Technologies Group (BTG) is a leading provider for guest and staff paging solutions, real-time location and tracking, as well as various forms of wireless communication systems. Thanks to Wisej.NET, they've turned a logistical nightmare into a robust solution that's easy to deploy.

Solid Migration Path for desktop solution

Daniel Kelly, who works as the Operations Manager for BTG, explains: "We were looking for a rapid development solution which enabled us to move away from thick clients and onto the web."

Deployment was a big challenge when a new software upgrade was available for the client side, as some of the larger customer sites have 300 or more client systems that had to be updated.

"The decision was made to move all our solutions to the web and Wisej.NET enabled us to rapidly convert our Windows applications into web based applications without having to be web design experts", continues Kelly.

Productivity Boost Compared to ASP.NET MVC

Before deciding to use Wisej.NET, the team at BTG looked into different options for web migration. They wanted to build upon their existing programming experience from Windows desktop applications. Initial steps were done with Visual Web GUI (VWG), which was soon found to be taken off the market. The next major focus was Microsoft's ASP.NET, but [“the learning curve of MVC \(when coming from a desktop background\) was quite steep and it took us almost 9 months to bring one of our products into the release phase”](#).

The team was rather disappointed as this timeline didn't provide a competitive option for web-enabling the rest of BTG's products. Daniel Kelly: [“We decided to look at Wisej.NET and realized that it was commercially ready and also had a very easy upgrade path from VWG or Windows Desktop applications.”](#)

As a proof of concept, the team converted the ASP.NET MVC application to Wisej.NET and it took less than one month to have the solution release-ready - a factor of 10x faster compared to the previous approach!

Solution for Hotels, Retail and Hospitals

Today, BTG uses Wisej.NET for internal requirements and as a technical basis for their “Connect” solution which can be described as a message routing solution to provide staff members real time alerts into various aspects of their business.

The 2000+ customers of Brighton Technologies Group mainly consist of clubs, pubs, hotels, retail and hospitals. The new Wisej.NET version of the BTG Connect suite is being rolled out and deployed to customer sites throughout Australia, Hong Kong, USA, and the UK.

The screenshot displays the BTG Connect suite interface. The top navigation bar includes the BTG logo, the date and time (Tuesday, 07 February 2023 11:09 AM), and various utility icons. The left sidebar contains a menu with options like 'Cat Files', 'Cat File Customers', 'Cat File Customer Groups', 'Cat File Categories', 'Cat File Results', 'Cat File Reports', and 'Cat File Budgets'. The main content area shows a data table for 'December - 2022' with columns for Ranking, Customer Name, Sale Value, and Category. The table lists 20 customers, with the top 5 highlighted in green. The 'Customer Count' is 1234. The bottom left corner shows the user is 'Administrator'.

Ranking	Customer Name	Sale Value	Category
1	Slade Pharmacy - Richmond		Pharmacies / Chemists
2	Les Forains - Pip Lowne		Food Outlets & Catering
3	Funtopia Regency Plaza		Retail Venues
4	Courthouse Hotel Australia (Newtown)		Hotels / Pubs / Restaurants
5	Frankie B's Garden Trading		Hotels / Pubs / Restaurants
6	The Star - Gold Coast		Clubs & Casinos
7	Gamal Abdel Halim - World Cargo Network P/L		Food Outlets & Catering
8	Treasury Brisbane (Treasury Casino Hotel)		Clubs & Casinos
9	The Captain Paddington - old owner		Hotels / Pubs / Restaurants
10	Bankstown District Sports Club Ltd (Bankstown Sports)		Clubs & Casinos
11	Compass - Spioflex Village		Sodexo / Compass / Redcape / Spioflex
12	Crome Plaza - Hunter Valley		Hotels / Pubs / Restaurants
13	The Star - Sydney (Casino - Gaming)		Clubs & Casinos
14	Sutherland District Trade Union Club Ltd-GYMEA (Tradies Gynea)		Clubs & Casinos
15	Tyalgum Hotel		Hotels / Pubs / Restaurants
16	Club Harrington		Clubs & Casinos
17	Hornsby RSL Club Ltd		Clubs & Casinos
18	Mount Pritchard & District Community Club Ltd (Mounties)		Clubs & Casinos
19	Club Marconi		Clubs & Casinos
20	Forster-Tuncurry Memorial Services - (Club Forster)		Clubs & Casinos

First Class Guidance and Support

The fast pace of development is one thing, but having access to good guidance and support is another important criteria for Daniel Kelly when evaluating technology: “The support system being offered (even the free forum) is second to none. We use a lot of third party components such as DevExpress, Syncfusion and Rebex and whilst they all offer good support options, the team at Ice Tea Group always just seem to go above and beyond with any issues.”.

Based on their experience with Wisej.NET, the team mentioned that you don't have to be a web expert to develop robust and very stylish applications with Wisej.NET.

Daniel adds: “I would also highly recommend any businesses to take up the additional support options as the team really do go above and beyond in answering any queries and providing feedback.”.

Results Achieved

- Fast application development, with a factor of 10x productivity gain compared to ASP.NET MVC
- Easy move from desktop to web with easier deployment for 500+ customers
- Helped hundreds of hospitality and healthcare clients to improve guest experience
- Familiar coding experience for R&D team with a flat learning curve thanks to Wisej.NET
